

# Aberforth UK Small Companies Fund

## Monthly Factsheet

31 October 2024

### Fund structure

The Fund is an authorised unit trust scheme under the Financial Services & Markets Act 2000 and also a UCITS scheme as defined by the Collective Investment Schemes Sourcebook. The Fund is open-ended and issues Accumulation (Acc) and Income (Inc) units.

### Manager: Aberforth Partners

The Fund is managed by Aberforth's investment team of six fund managers:

Sam Ford	Jeremy Hall
Euan Macdonald	Rowan Marron
Rob Scott Moncrieff	Peter Shaw

Further information on the investment team is available at [www.aberforth.co.uk](http://www.aberforth.co.uk).

### Benchmark: DNSCI (XIC)

The Fund's primary investment universe is the Deutsche Numis Smaller Companies Index (excluding Investment Companies). It is used as a target and comparator benchmark. The DNSCI (XIC) index is rebalanced every January and its profile at the date of this Factsheet was:

Number of companies	332
Total market value	£143bn

Final distribution (paid 28 Feb 24)	392.8468p

### Objective

The investment objective of the Fund is to seek to achieve a total return, calculated on an income reinvested basis, greater than the Deutsche Numis Smaller Companies Index (excluding Investment Companies) over the long term, with the focus on rolling five year periods.

### Investment style: Value

Aberforth are value investors who buy shares in companies that they calculate to be selling below their intrinsic value. This is determined through detailed financial and industrial analysis, combined with a valuation approach that focuses on both stockmarket and corporate worth.

### Investment performance (annualised total returns)

Growth (%)	1m	3m	12m	3y	5y	Launch
Unit price	-4.1	-7.2	24.4	1.9	5.7	11.2

Notes: 1m & 3m returns not annualised; Launch date = 20 Mar 91; Unit price = Cancellation price of the Fund's Accumulation units.

### Monthly investment commentary: October

Globally, October was a risk-off month. Equity markets and commodity prices were down, while bond yields and the dollar rose. US stocks out-performed and within the UK large caps out-performed smaller companies. The value style under-performed against growth. This was a headwind to the Fund, which fell 4.1%, compared to the 2.7% decline for the benchmark DNSCI (XIC).

Performance detractors included **Close Brothers**, which fell after a legal appeal against the company was upheld in court. The case relates to commissions paid by lenders on motor finance arrangements and may increase potential compensation payable by Close and other lenders in relation to commission disclosures. **Card Factory** continued its poor share price run that began after the release of its interim results in September. The stockmarket appears to be questioning the company's full year ambitions. Additionally, the Budget, with tax increases on employers and greater-than-expected-increases to the minimum wage, has also damaged sentiment for retailers. Shares in **NCC Group** were weak. With no company specific news, this was likely the result of profit-taking, after a strong run year-to-date.

Among the positive contributors to performance was **Galliford Try**, as the market digested its full year results, a further share buy-back announcement and management's confident tone for continued progress. Despite a still difficult trading backdrop, **Robert Walters'** share price rebounded following a reassuring mid-month trading update. Others whose shares recovered in October included **Enquest**, which rose after a better-than-feared Budget for the oil and gas sector, and **Videndum**, which announced a change of CEO towards the end of the month.

## Data sources & calculations

All data supplied by Aberforth, except DNSCI (XIC) data (from Numis/Paul Marsh and Elroy Dimson – London Business School) and FTSE data (from FTSE International Limited).

Performance returns are total returns after all expenses and assume reinvestment of dividends. Yield is based on the Fund's trailing 12 months' dividends. Active share is a measure of how the Fund's portfolio differs from the DNSCI (XIC). Small companies are represented by the DNSCI (XIC).

## Standardised past performance

Discrete total return performance over 12 month periods to 30 September:

Growth (%)	2024	2023	2022	2021	2020

## Risk warnings

Capital may be at risk as the value of investments may go down as well as up and is not guaranteed; therefore investors may not get back the amount originally invested. Past performance is not a guide to future performance, nor a reliable indicator of future results or performance.

Investments in shares of smaller companies are generally considered to carry a higher degree of risk as the market for their shares may be less liquid than that for shares of larger companies, making shares of smaller companies more difficult to buy and sell.

The performance of shares of smaller companies may be more volatile than the shares of larger companies over short time periods; therefore investors should regard such investments as long term.

There can be no guarantee that the investment objective of the Fund will be achieved or provide the returns sought by the Fund.

An investment in the Fund is only suitable for investors who are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses which may arise from such an investment (which may be equal to the whole amount invested). Such an investment should be regarded as long term in nature and complementary to existing investments in a range of other financial assets and should not form a major part of an investment portfolio.

The dealing spread of the Fund, which represents the difference between the buying and selling prices, will have an impact on the realisable value of any investment made in the Fund, particularly in the short term. To mitigate the impact of capital erosion, investors should regard investments in the Fund as long term.
